The Concept

The main drive behind ECO CAR wash procedure is to utilize people cars idle parking time, whether it is rest times, shopping, working and provide ECO friendly professional car wash service, without the need to bother customers to either move their cars from their parking spot or waste time at car wash stations.

The cart could be operated by just one person. A regular sedan could be washed in just 15 minutes without water..

FREE**

What We do

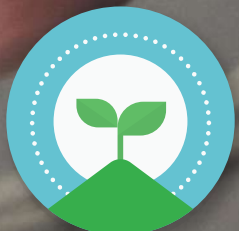

We offer waterless car washing service to wash and wax vehicles in a single step.

Our unique blend of cleaning agents, real carnauba wax and polymers work effectively to achieve the desired results, leaving a mirror-like finish along with providing UV protection to vehicles that lasts for days.

Our waterless car wash products are all non-toxic, biodegradable and Eco-friendly,.

The spray-on cleaner introduced by us safely removes surface contaminants and leaves your car absolutely spotless and scratch-free.

We care about the environment

Our waterless system is actively helping to save millions of liters of water per year. Classic car wash procedures use high pressure machines and consume large amount of water and chemicals down the drain.

Our approach enable our crew use the right quantity of Eco Friendly formula and apply them as a mist and remove dust and dirt using microfiber cloth.

Cleaning as well as Protection

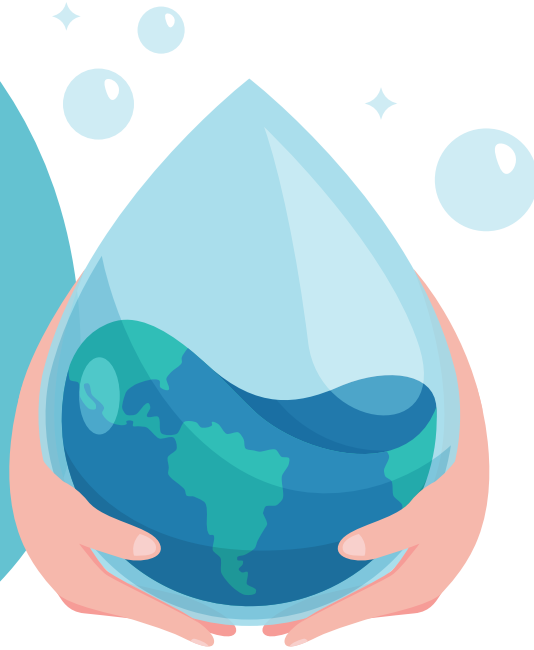

As we touched on above, our waterless wash & wax contains wax, so not only are you cleaning your car, you're protecting it too. This is great for those times when your car isn't looking too bad, but you want to add a bit of shine!

Goodbye to floor stains!

One of the downsides to cleaning your car with water is water marks.

These occur when water is left to sit on the floor paintwork or epoxy, and they can be quite hard to remove because of the salt and other minerals they contain.

With a water-free wash, there's obviously no danger of this kind of water staining.

Waterless

The innovation has transformed the classic car wash concept to become a fully integrated ECO friendly car wash system. The waterless cleaning system helps save lots of water down the drain.

Machine Features

Easy to move around.

Does not need charging or power connection

Does not need to be connected to a water hose.

Does not leak water or leave any dirt.

Our Staff

Our cleaners are highly trained, qualified, and professionals to ensure effective and safe cleaning.

All of our cleaners are trained in how to communicate with the clients using etiquette techniques.

All of our staff speak English and have been carefully trained.

Safe on exterior

All towels used are microfiber towels, the long fibers are safe on cars exterior yet are very effective on dirt and dust. The short fibers are used for window cleaning.
